Save space

This compact laser fax machine doubles up as a printer and a copier. The built-in handset frees up space without the need to purchase a separate phone for your office. The compact size is packed with many features and its aesthetic design fits right into your modern office environment.

Increase productivity

Reduce the hassle with 222 contacts stored and gain quick access to frequently dialled numbers. Its fast print speed of up to 21 pages per minute (ppm) means you get your faxes and printouts quick. PC send and receive feature also means you can preview faxes before printing thus eliminating printing of junk faxes and translates to saving paper.

Save money

Send out faxes during off-peak times to avoid additional charges with the fax timer function capable of setting up to 50 timers. There is also plenty of cost cutting as you print in bulk with the optional high-yield toners, thereby reducing toner and paper expenses. With the toner save mode, you can print draft documents and save on toner.

Exceptional quality

Achieve an immaculate finish with high quality printouts of up to 2,400 x 600 dots per inch (dpi) to win your clients over and take your presentations to the next level.

Environmentally friendly

Being Energy Star compliant, the fax series has low power consumption and reduces electricity bills. It consumes only 1.5 watts when not in use with the new power saving mode. It keeps paper wastage low by viewing your documents before printing with the PC fax send and receive.
