binding capacity up to 135 sheets (13,5 mm)

*80 gr./m²

WORKFLOW

Punching

Insert paper into the punching slot and pull the lever forward to punch the paper.

Inserting

After punching insert the sheets into the integrated holding fixture.

Closing

Take punched book out of the holding fixture and put it vertically into the closing unit. To close the wire element.

Ready !

By using the integrated measuring scale it is very easy to determine the diameter of the wire element. Put the book under the measuring scale, push the slider downwards and read the correct diameter of the binding element.

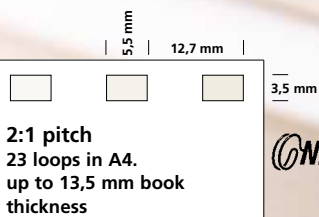

The adjustment scale helps to select the punching function as well as the different diameters for closing.
