SA360 SA360W

Biometric Time Attendance System With Access Control

The Timetera SA360 facial recognition terminal offers rapid, contactless identity verification through advanced biometric technology. Its dual HD infrared cameras and advanced face recognition algorithms enable fast and accurate facial feature detection during enrollment and verification, even in low light environments. Customized for door access usage, the SA360 is an excellent option for small and medium-sized businesses seeking a reliable and contactless solution.

Speedy Recognition

Backlight technology power saving scanner with an auto turn-off function, ensuring a longer lifespan.

Software Control

Control and manage your data with Timetera TCSM.

Dual HD Infrared Camera

captures high-resolution images in visible light and infrared, enhancing facial recognition and biometrics by detecting heat signatures.

Multi-Verification Method

You have multiple verification option with SA360. Verify yourself using face, card, finger, even by password.

Easy Communication Methods

Sync SA360 with PC using one of these easy-to-use communication methods : TCP/IP, USB, Or Wifi.

Easy Data Management

With software you can manage data more systematic.
